LET US INTRODUCE OURSELVES

Founded in 1997, ACOR Consultants began as a group of engineers with a unique set of personal and professional values providing specialist consulting services.

From these humble beginnings, we are proud to have grown to be one of Australia's largest employee-owned engineering firms. We are committed to our mission of investing in the success of our clients and creating an environment where people thrive.

With over 500 people nationwide, we strive to work as One Team, One ACOR, putting our client's needs at the forefront. ACOR Consultants leverage our robust national network of trusted clients and collaborators to help them achieve their objectives. Using our broad consulting capabilities, we develop unique solutions to create value for our clients and ACOR.

Through our multi-disciplinary skills, experience, and capability, ACOR has been actively participating in creating some of Australia's largest and most iconic projects. We aim to add value at every project stage by bringing together passionate, dedicated people who challenge, explore, and expand traditional thinking through a hands-on approach. Through the ACOR Graduate Development Program, you can participate in our national delivery model and share knowledge, expertise, and lessons learned with all our people across the country.

Investing in the success of our clients and creating an environment where people thrive

OUR VALUES

We pride ourselves on having personal, caring, results-orientated relationships with our clients and staff, enabling us to add better value to clients consistently.

Integrity

Passion

Courage

Excellence

Caring

Collaboration

What sets us apart?

We are large enough to be able to offer our clients a complete and diversified range of engineering services, but not so large that we lose our ability to provide a personal service whilst being flexible and innovative in our approach.

We pride ourselves on having personal, caring, results-orientated relationships with our clients and staff, enabling us to add better value consistently.

What are we about?

We measure success by the strength of our relationships, the trust our clients place in us, the specialists we attract to work with us, and the quality of the projects we deliver.

OUR WORKPLACE

Our Differences are Our Strengths

The diversity of our employees enables us to collaborate better, be more creative, achieve more outstanding quality and innovate.

We value and support diversity and inclusion in our workplace, and we want to continue building a culture that accepts and encourages our employees to bring all of themselves and their individual uniqueness to work.

Our clients, stakeholders and communities come from all walks of life, and so do we. We have several initiatives to encourage greater diversity and inclusion:

At ACOR, you will be provided the strategic direction, leadership, and operational support you need to learn and grow in your profession.

Disability Inclusion

We believe it's essential to ensure that people with disabilities have opportunities for meaningful and rewarding employment.

We partner with a disability employment provider that offers job placement and ongoing job training and support to people with disabilities.

OUR WORKPLACE

Indigenous Reconciliation

At the heart of our ACOR Values are the ideals of doing the right thing for all people, the environment, and communities. These Values align with Indigenous peoples, who strive to live in Harmony with Country.

Led by our Indigenous Reconciliation Committee (IRC), ACOR is committed to strengthening our relationship with local Indigenous peoples and facilitating reconciliation within our business. We are doing this by increasing our cultural awareness and understanding of Indigenous history, truth-telling, and fostering positive relationships through our interactions in business and the wider community.

We partner with Indigenous Business through Supply Nation and provide pathways and support systems for Indigenous adults to attend and graduate from university with high marks and industry experience through our partnership with CareerTrackers.

Diversity

ACOR places high value on having a workforce that is fair and inclusive. We acknowledge that collaboration, creativity, and innovation result in positive impacts that mutually reward our staff, clients, and community. ACOR is dedicated to enhancing diversity and inclusion, which aligns with our values and mission. We're proud to be an Equal Opportunity Employer as recognised by the Diversity Council of Australia 'Inclusive Employer 22/23'.

We invest in our talents through professional development and opportunities to network and connect. ACOR is committed to promoting women's careers and increasing their representation in leadership positions across the business. Through partnerships with industry organisations, ACOR is working to encourage more women to pursue rewarding careers in STEM.

OUR WORKPLACE

Employee Owned What makes us different from other companies is that we are owned by our employees – about 15% of all employees are shareholders.

Each year, employees are invited to become owners of the business, allowing us to maintain a genuine, diverse leadership.

Health & Wellbeing

We provide our employees with an Employee Assistance Program (EAP) - a counselling service to support emotional and psychological well-being in the workplace and their personal lives.

Counselling provides an opportunity for a confidential conversation with an experienced counsellor - a chance to talk freely, discuss strategies, develop skills, and gain information and advice to improve well-being and life satisfaction.

Diverse Workspace Many of our teams consist of members from different states, and the diversity of jobs we are involved in means our people often work from various locations.

We are flexible in how our teams are structured, which increases both client and employee satisfaction; we also have hybrid working options.

REWARDS AND BENEFITS

Study Support

We support and assist employees through study and exam leave, work flexibility and financial support for approved education.

\$

Remuneration

We offer market-competitive salary packages and review employee salaries annually. A review of your salary package will take into consideration your role, your performance, market conditions and company results.

Employee Assistance Program

Free and confidential phone counselling for employees and their direct family members experiencing personal and workplace issues.

Refer ACOR to people who fit our culture and receive a \$5,000 bonus if they successfully gain permanent employment.

We reward and recognise our people, in particular, those who embody our values

Salary Packaging Option

We offer options to package your salary and allocate it towards various options such as super, a motor vehicle, or items predominantly utilised for business purposes.

Social Events

We love getting together to have fun at work and celebrate our team wins. There's something available for everyone, whether it's sporting events, trivia or movie nights, multicultural days or Friday night drinks.

Fitness I-I Activities

Each office provides its own form of support for staff fitness, whether hosting sporting events, morning exercise classes or participating in local gyms.

Clients and Sectors

ACOR has built a multi-disciplinary engineering capability spanning diverse market sectors. Our portfolio aligns strategically with a national key client base, meaning employees get the opportunity to work on projects of different scales and scopes with other ACOR team members across the country.

Energy

ACOR is one of Australia's leading Energy Consultants specialising in design, risk, safety and compliance.

We understand the specific demands and environments within the Energy space and apply a broad spectrum of engineering and consulting disciplines to provide tailored solutions to meet our clients' requirements.

Defence

For over 20 years, ACOR has been working on projects for the Department of Defence Australia-wide.

We have been involved at all levels, from planning and delivering major projects to facility maintenance projects on the Estate Works Program (EWP) and specialist expertise on panels such as the Defence Fuel Supply Chain Technical Expertise Panel.

Health & Aged Care

ACOR is committed to delivering worldclass Health & Aged Care facilities in both public and private sectors. We bring a proven track record of multi-disciplinary services, offering a blend of stakeholder engagement expertise, knowledge of hospital operations and aged care facilities, constructability, staging and the design & coordination of 3D documentation.

Commercial

We have been involved in the planning and delivering commercial offices and industrial and warehousing projects since our inception. Adopting leading-edge technology and 3D design tools allows us to collaborate on complex projects to provide cost-effective and future-proofed results. We work on large and medium-scale projects alongside architects, developers, managing contractors, project managers, asset managers and facility owners.

Our business model is underpinned by our Client Relationships - great clients and interesting and challenging work that provides rewarding career opportunities for our employees.

Working with ACOR

Graduate Development Program

One ACOR Digital Workplace

ACOR Consultants has a proven track record for delivering value for our clients through a consistent, agile, and well-coordinated national delivery model. Our goal is to work as One ACOR and align each practice, sharing knowledge, expertise and lessons learned across all our people.

We continue to invest in developing the technical expertise of our team members to ensure we continue to provide innovative and cost-effective design solutions.

Our Graduate Development Program aims to develop Engineering graduates into versatile consultants who can cater to our client's needs while preparing them to lead our business in the future. This two-year program is designed to provide you with technical training in your chosen area of engineering, along with supported activities to help you develop your business and consulting skills and make an impact within our business. The benefits of our program include:

- On-the-job technical training and targeted experiences to develop your skillset,
- Opportunities to engage with industry networks and associations, including Engineers Australia,
- Networking events and meetings with other graduates across the country and disciplines,
- Meetings with our executive leaders and service line leaders,
- Mentoring program,
- Training for business and consulting skills and project management,
- A personalised development plan to help you achieve your career goals.

ACOR Consultants has a close relationship with Engineers
Australia and is committed to supporting their learning and development. We support Engineers Australia
Membership for graduates who aspire to gain their CPEng accreditation in the future.

Working with ACOR

Secondments

ACOR offers secondment opportunities to different locations for varying durations. These great learning experiences allow employees to work in a different location and collaborate with other ACOR team members.

ADD Program

The ACOR Digital & Development (ADD) Program was created to gather great ideas and allocate time during work hours to develop better working methods. If someone has an idea, they can submit a proposal to the ADD program, and if it is successful, they'll be offered the support to make it happen.

Digital Innovation

Innovation is embedded in our work culture and is fundamental to our approach. Our Digital Practice Team collaborates across disciplines to achieve a holistic approach to our digital strategy whilst identifying opportunities to add value to projects. To us, Digital Innovation is all about finding better ways to do our work and challenging ourselves to develop new capabilities to compete in a rapidly shifting industry.

3D software and application of the latest technology is essential to ensuring we deliver engineering solutions that are sustainable, future-proof and cost-effective for our clients.

Drone Data Capture

Drone operations are extending the capabilities of ACOR. This technology is increasingly essential in Digital Engineering. Drones offer ACOR the ability to supplement surveys, capture in-progress or as-built site conditions and inspect roofs and facades - leading to greater accuracy in design and more effective collaboration.

Working with ACOR

Civil Engineering & WSUD

The ACOR Civil Engineering team is embedded in our core service offerings across national offices. Our delivery approach includes fully integrating BIM software to streamline coordination when collaborating with larger multi-disciplinary teams.

Structural Engineering was one of ACOR's founding services and has grown to a team of over 100 engineers, servicing our clients across multiple sectors nationally. Our team has a proven track record of working with steel, timber and concrete when navigating complex operational and staging

Remedial Engineering

ACOR's Remedial Team specialises in diagnosis and condition assessment, litigation support, specialist waterproofing of above and below-ground structures, and rehabilitation of strata & commercial buildings, facades, and civil structures.

Energy and Dangerous Goods Consulting

With the largest number of AIDGC recognised Dangerous Goods Consultants in Australia, ACOR's specialist team provides risk management services for transporting, storing and handling dangerous goods, fuels, and chemicals. Our solid future fuels team within ACOR focuses on specialties such as hydrogen, renewable energy, and lithium-ion batteries.

Building Services

requirements.

Structural

Engineering

We specialise in Mechanical and Electrical engineering as well as Hydraulic and Fire Services, Environmentally Sustainable Design (ESD), Strategic Asset Management, Vertical Transportation and Acoustics.

Environmentally Sustainable Design

Sustainability is at the forefront of all ACOR design and engineering solutions. The main aim of sustainable design in a project is to reduce energy, water, and materials usage, minimise waste, increase the longevity of a building's life cycle and create a built environment that is accessible, safe and healthy for occupants.

GRADUATE PROFILE

Yasmine FitzGerald

Graduate Fire Services Engineer (Canberra)

Career Journey

I started with ACOR in March 2023 as an Undergraduate Fire Services Engineer; having completed my coursework at the conclusion of 2022, I still needed to fulfil my placement requirements to graduate. Upon completing my placement hours, I continued with ACOR as a Graduate Fire Services Engineer.

What is the most satisfying thing about your role?

The most satisfying thing about my role is you feel like you are continually learning new things and developing your skills. Every new project presents a new challenge that keeps my role exciting and engaging.

What do ACOR's Values mean to you?

ACOR's values are values that are fundamental to both my personal and professional growth. I believe passion drives you to pursue excellence and facilitates a collaborative environment that fosters collective success.

What advice would you give to an entry level graduate?

Be open to new experiences and opportunities as it may lead you down an exciting career you didn't know existed.

GRADUATE PROFILE

Caitlin Russell

Senior Civil Engineer (Sydney)

Career Journey

I started as an undergrad in my 3rd year of university, working part-time to fulfil the industry training requirement of my degree. Since starting full-time as a graduate, I have had the opportunity to work on a wide range of projects of different sizes, sectors, and all areas of Civil design. I have also had the opportunity to take time off to travel and pursue some interests outside of work, which ACOR was very flexible and allowed me to do. I am currently working on several Hospital redevelopments and two new aquatic centres.

What challenges have you faced?

It takes time to get to a point where you really feel that you know what you're doing and feel confident about it. As a grad and a junior engineer, it's hard not to get overwhelmed by the intricacies of the job and the realisation that after four years of study, you still have so much to learn. As an engineer, the industry constantly evolves, so lifelong learning and continual professional development are unavoidable.

Understanding that there will always be new things to learn and unique challenges on each project has been daunting. Still, it provides an exciting challenge and means that a career in engineering will never be stagnant or monotonous.

"The most satisfying thing about my role is seeing the things that I have designed come to life."

What's something unique about ACOR?

There is no such thing as a "typical work day" at ACOR. I never quite know what to expect walking in each day. You need to be able to be agile with your workload because of the varying types and sizes of projects ACOR does. Typically, each day, you will jump between multiple projects. People aren't expecting you to be perfect and get things right the first time; the most important thing is just to have a go - that is the fastest way to learn!

What do ACOR's Values mean to you?

They lay the foundation for the company culture and attract people with similar values and priorities, so you're working in a very supportive team that is keen to produce good quality work. Everyone is on the same page.

GRADUATE PROFILE

Nicholas Wynne

Project Manager (Melbourne)

Career Journey

Since joining ACOR, my understanding of the industry and our role in our communities has naturally developed through my exposure to various projects. My induction began with a period primarily focused on understanding the work I would be involved with and the processes and systems used throughout ACOR. Since then, I have contributed to various Defence EWP Projects through all phases of the project lifecycle. The multidisciplinary nature of the EWP projects has provided me with valuable exposure to different engineering disciplines within ACOR. Currently, I assist with the design and project management of multiple EWP projects in Victoria. I have had the opportunity to participate in some interstate site visits, which I have really enjoyed.

Most satisfying thing about your role?

Witnessing design projects develop and come to fruition throughout the project lifecycle and knowing my contribution to that development is incredibly satisfying. Getting out on site, understanding the project scope, and then working with the team to develop the design from an initial project brief to a completed final design package, tender package, and construction package provides a real sense of achievement and a tangible outcome.

I also enjoy the focus on collaboration and teamwork required to deliver projects successfully. Though I have yet to see a project through its entire lifecycle, from scoping and feasibility through to handover, it would be incredibly rewarding. I look forward to that moment with the projects I am working on now.

What advice would you give to a graduate?

Pretty standard advice, but don't be afraid to get out of your comfort zone. Don't be scared to ask questions if you're unsure about something, and don't be afraid of the unfamiliar; the more exposure you can get to different concepts and ideas, the more you will get out of it.
